**COMPONENT LIST**

- 30mm Micro USB Cable
- 500mm Fan to Fan Cable
- 600mm Micro-USB Cable
- 500mm Power Cable
- 500mm Lighting Connection Cable

**INSTALLATION**

1. Connect the 500mm cable to the Fan.
2. Connect the 600mm cable to the Fan.
3. Connect the 500mm Power Cable to the Fan.
4. Connect the Lighting Connection Cable to the Fan.

**MODE CUSTOMIZATIONS**

- **Audio Modes**
  - Bass
  - Gain
  - Level
- **Smart Modes**
  - Breathing
  - CPU Temperature
- **Visual Customizations**
  - Health (Limited to compatible games)
  - Frequency (Limited to compatible games)
  - Heatsink

**Details**

- Connect the 500mm cable to the Fan.
- Connect the 600mm cable to the Fan.
- Connect the 500mm Power Cable to the Fan.
- Connect the Lighting Connection Cable to the Fan.

**STEP 1**

Connect the 500mm cable to the Fan.

**STEP 2**

Connect the 600mm cable to the Fan.

**STEP 3**

Connect the 500mm Power Cable to the Fan.

**STEP 4**

Connect the Lighting Connection Cable to the Fan.

Troubleshooting

NZXT Warranty

1. Problem: No LED lights are turning on. Steps:
   a. Install NZXT CAM and connect the USB cable. Ensure the device is connected to USB 2.0 or higher.
   b. Connect the Micro-USB connector at the end of the connection cable to the controller.
   c. Connect the LED connector on the HUE 2 lighting kit to the 5-pin connector on the controller. Ensure the LED connector is properly seated.

2. Problem: The LED lights are turning on, but the fan is not. Steps:
   a. Connect the connectors of the fan to the HUE 2 lighting kit via the Micro-USB cable. Ensure the connection is secure.
   b. Connect the power connectors of the fan to the HUE 2 lighting kit via the Micro-USB cable. Ensure the connection is secure.

3. Problem: The fan is not turning on. Steps:
   a. Connect the Micro-USB cable to the controller and the fan. Ensure the connection is secure.
   b. Connect the power connectors of the fan to the HUE 2 lighting kit via the Micro-USB cable. Ensure the connection is secure.

4. Problem: The fan is not turning on, but the LED lights are. Steps:
   a. Connect the LED connector on the HUE 2 lighting kit to the 5-pin connector on the controller. Ensure the LED connector is properly seated.
   b. Connect the power connectors of the fan to the HUE 2 lighting kit via the Micro-USB cable. Ensure the connection is secure.

5. Problem: No LED lights are turning on. Steps:
   a. Install NZXT CAM and connect the USB cable. Ensure the device is connected to USB 2.0 or higher.
   b. Connect the Micro-USB connector at the end of the connection cable to the controller.
   c. Connect the LED connector on the HUE 2 lighting kit to the 5-pin connector on the controller. Ensure the LED connector is properly seated.

6. Problem: The LED lights are turning on, but the fan is not. Steps:
   a. Connect the connectors of the fan to the HUE 2 lighting kit via the Micro-USB cable. Ensure the connection is secure.
   b. Connect the power connectors of the fan to the HUE 2 lighting kit via the Micro-USB cable. Ensure the connection is secure.

7. Problem: The fan is not turning on. Steps:
   a. Connect the Micro-USB cable to the controller and the fan. Ensure the connection is secure.
   b. Connect the power connectors of the fan to the HUE 2 lighting kit via the Micro-USB cable. Ensure the connection is secure.

8. Problem: The fan is not turning on, but the LED lights are. Steps:
   a. Connect the LED connector on the HUE 2 lighting kit to the 5-pin connector on the controller. Ensure the LED connector is properly seated.
   b. Connect the power connectors of the fan to the HUE 2 lighting kit via the Micro-USB cable. Ensure the connection is secure.

SUPPORT AND SERVICE

In case you have any questions or problems with your NZXT product, please refer to the troubleshooting guide included in this manual. If your issue is not resolved after following the troubleshooting guide, please contact us through our official support portal.
